BFC mode (Siemens x65 Service mode)

Structure of an BFC Command:

Header (6 Bytes)	Subdata (x Bytes)	Checksum (2 Bytes)
[Command] [01] [Length, Length] [Chk Flag] [Header XOR]	[Subdata, ...]	[Checksum]

[Command]:
see Command Table

[Length]:
Length of Subdata

[Chk Flag]:
0x20: CRC16
0x04: no checksum

[Header XOR]:
XOR of all Header Bytes

Starting the BFC mode:

There are two different ways to put the phone into BFC mode. Phone can be online or offline.
for offline mode an flashable cable must be present.

2.1) starting the online BFC mode

Starting the online BFC mode is simple:
- set port speed to 115200 Baud
- make shure you can access the AT mode
- send the AT command **AT^SQWE=1 + 0x13**

That's all, you're in online BFC mode now ;)

2.2) starting the offline BFC mode

Starting the offline BFC mode is more work:
- set port speed to 115200 Baud
- send "AT" to the Port in a loop. Wait 50ms after every command
- when the user presses the red key, the mobile will answer with 0xB0
- now you can send the Bootcode to the phone:

```
30 57 00
F1 04 A0 E3 20 10 90 E5 FF 10 C1 E3 A5 10 81 E3
20 10 80 E5 1E FF 2F E1 04 01 08 00 00 00 00 00
00 00 00 00 00 00 00 00 53 49 45 4D 45 4E 53 5F
42 4F 4F 54 43 4F 44 45 01 00 07 00 00 00 00 00
00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00
01 04 05 00 8B 00 8B
96
```

- phone will answer with: 0xB1
now you have to wait some time till phone is ready with booting.

you can send an Authentification for command 0x11 to see when phone is started (Ping).
now you are in offline BFC mode.

Leave BFC mode:

Leaving BFC mode is different for online and offline mode.
In online mode send command: SwitchFromBfcToRccpMode In offline mode send command: TurnMobileOn or TurnMobileOff

Full Command List (without names):

This is a bruteforced list from CX65 with FW25. If you like to try out
unexplored commands, you should start with commands from this list.
This
should be all commands included into the firmware. Note, that for S65
there
may be some more commands because of the MMC and BT.
